To him statehood was almost a philo-hood was almost a philohood was almost a philo-sophical abstraction and it could indeed be dispensed with in the formulation of his theory of a spiritual centre. Today we realize that all the theoretical arguments are invalid. A nation will evolve its national culture out of the patterns of political social life it forms. Tradition and philosophical ideals will have something to do with the shape of those patterns; but they are also determined by the external world. One has only to think of the effect of a generation of the present state of no-peace on the youth of Israel; and social development right at the start of nationhood, to see that if Jewish tradition establishes a pattern for the moulding of the nation, external circumstances will also be significant factors.

This is perhaps why there has been so much feonfusing between thinkers.

This is perhaps why there has been so much confusion between thinkers in Israel and the Diaspora since the State came into being; why they have not been able to find an easy bridge over which the cultural and spiritual influences they excect from Israel are to pass. That is why few voices harked back to Ahad Ha'am at the 24th Zionist Congress.

But all this does not diminish the glory of his achievement. He fired the hearts of a "hole generation of intellectuals with the flame of pure, spiritual Zionism; he left his impress on the language which will be spoken here for the years to come. THE account of the history
conference heard last
Thursday ran a familiar gamut. The formula is simple
but satisfactory and there is
no reason to abandon it. This
report, edited by Emek Perry,
brought a few of the conferunce's highlights, omitted
imany others, and made us all
feel that we were hearing important new facts or theories,
even if we could not quite
follow them. Jewish subjects
formed only part of the conference's deliberations, but
the brondeast was almost entirely Judeocentric. Most of
the proceedings were briefly
reported. The general effect
was very superficial and very
